**International Workshop on
Phonosurgery &
Functional Laryngology**

January 20 – 22, 2016

Department of Otorhinolaryngology,
Plastic, Aesthetic & Reconstructive
Head & Neck Surgery
University Hospital Wuerzburg

Welcome to Wuerzburg

Dear colleagues,
dear friends,

In Jan 2016 there will be the 10th Workshop on Phonosurgery held in Wuerzburg. This workshop has developed from a national wide course covering fundamentals in phonosurgical techniques to an international forum with a broad spectrum. On one hand the practical hands-on training parts are still key to the success of the course. On the other hand live demonstration of surgery in 3D HD and multidirectional discussion will again be vivid and inspiring for all. The lectures will start at the basics of phonosurgery and functional laryngology and will cover a variety of topics before we will discuss on a scientific level therapeutic options of the paralyzed larynx: state of the art in passive remodelling the larynx, break throughs in laryngeal re-innervation procedures and perspectives in laryngeal pacing.

We are looking forward to welcoming you in Wuerzburg and to experiencing a personally and scientifically enriching workshop.
