

Multidisciplinary discussion on malignant skull base tumours

Live Virtual Format

Tuesday, September 27, 2022 from 18:30 to 20:00 CET

Free Registration – [Register here](#)

The role of a multidisciplinary team approach in the management of malignant tumours of the skull base is paramount. The large majority of these lesions are diagnosed at an advanced stage, so that only in rare instances their treatment can include a single modality. The presence of different histologies with variable biological profile and behaviour is another element which in recent years has led to develop the concept of histology-driven treatment and reinforce the need for a multidisciplinary approach to malignant tumours involving the skull base. The present seminar will provide the audience with a live discussion on cases of malignant tumours of the skull base, with the participation of a group of experts in different disciplines who are pivotal to assess the critical patterns of growth of the disease in a complex anatomic area and identify the optimal therapeutic strategy. The audience will have the possibility to interact with the panellists.

Moderator

Prof. Piero Nicolai (Italy)
Director of the Otolaryngology
Unit at the University of Padua
- Padua University Hospital

Speakers

Prof. Paolo Bossi (Italy)
University of Brescia.
Medical Oncology

**Prof. Vincent Grégoire
(France)**
Centre Léon Bérard, Lyon.
Head of the Radiation
Oncology Department

**Prof. Philippe Herman
(France)**
Chairman of the ENT
Department in Lariboisiere
Hospital. Neuroscience
Medical Director

**Prof. Roberto Maroldi
(Italy)**
University of Brescia
Professor of Radiology
